PROFESSIONAL SUMMARY

Detail-oriented and analytically driven fresher with hands-on project and internship experience in Python, SQL, Power BI, Tableau, and Machine Learning, seeking an entry-level analyst role to deliver data-driven insights for consulting and IT services environments. Skilled in exploratory data analysis, predictive modeling, dashboard development, and stakeholder reporting, with demonstrated ability to translate raw data into actionable business recommendations through academic projects and internship work. Strong foundation in statistical analysis, data visualization, and end-to-end analytics workflows, with a keen interest in applying analytical rigor to solve client business problems.

CORE COMPETENCIES & TECHNICAL SKILLS

Programming & Querying: Python (Pandas, NumPy, Scikit-Learn), SQL (Joins, Window Functions, Query Optimization)

Data Visualization & BI Tools: Power BI, Tableau, Microsoft Excel (Pivot Tables, VLOOKUP), Plotly, Matplotlib, Streamlit

Analytics & Machine Learning: Exploratory Data Analysis (EDA), Statistical Analysis, Predictive Modeling, Regression, XGBoost, Model Evaluation

Business & Reporting: KPI Reporting, Data-Driven Decision Making, Dashboard Design, Data Storytelling, Stakeholder Communication

Tools & Platforms: Git, GitHub, Jupyter Notebook, Data Cleaning & Preprocessing

PROFESSIONAL EXPERIENCE

Data Analytics Intern | Dyashin Technosoft

Feb 2026 – Jun 2026

- Analyzed multi-source business datasets using Python, SQL, Pandas, and NumPy to support recurring reporting and decision-making needs.
- Built interactive Power BI and Tableau dashboards to visualize KPIs and operational trends for stakeholder review.
- Performed data cleaning, validation, and preprocessing on raw datasets, improving overall data quality and reporting accuracy.

KEY PROJECTS

HR Analytics AI Dashboard — Python, Streamlit, XGBoost, EDA

- Designed and deployed an end-to-end HR Analytics dashboard enabling real-time visibility into employee attrition risk for HR stakeholders.
- Performed data cleaning, EDA, and feature engineering on employee datasets to identify key drivers of attrition.
- Built and tuned an XGBoost classification model achieving 87% prediction accuracy, supporting proactive retention planning.

E-Commerce Sales Performance Analysis — Power BI, DAX, Data Modeling

- Developed an interactive Power BI dashboard analyzing 20,000+ orders and 8,000+ customers across ₹70M+ in sales revenue to surface behavior and performance trends.
- Created KPI, customer segmentation, product performance, and operational analytics reports used to inform business strategy.
- Delivered data-driven recommendations that identified opportunities to improve customer retention, delivery performance, and revenue growth.

Blockchain-Based Electronic Voting System — Blockchain, Cryptography, Python

- Designed and implemented a decentralized electronic voting system using blockchain and cryptographic techniques to ensure data integrity and voter privacy.
- Built a transparent, tamper-resistant voting mechanism supporting anonymous ballots while maintaining accurate, verifiable vote counts.
- Co-authored and published a research paper documenting the system's architecture and security methodology.

EDUCATION

B.E. Computer Science & Engineering | City Engineering College | CGPA: 7.0

2026

PUC Science | 80%

2022

SSLC | 84%

2020

CERTIFICATIONS & ACHIEVEMENTS

- Python Essentials 1 — Cisco Networking Academy
- Published research paper: "Blockchain-Based Electronic Voting System"
